Technical Documentation for Your E-Commerce Store

2... Key Workflows

a.. User Browsing Products:
  - User visits the marketplace frontend to browse product listings.
  - Frontend requests data from the Product Data API in Sanity CMS, which fetches product details to display.
b.. Adding Products to Cart:
  - User selects products and adds them to the cart.
  - Cart interactions handled through Sanity CMS.
c.. Placing Orders:
  - User confirms order and makes payment via third-party payment gateway API.
  - Order details are stored in Sanity CMS, and shipment details are updated via shipment tracking APIs.
